

SMARTWATCH WATCHMARK WL15

DEAR CUSTOMER, THANK YOU FOR PURCHASING OUR PRODUCT!

Please read the entire instruction manual carefully before use. It is recommended to use only the original battery, charger and accessories included with the device. Neither the manufacturer nor the distributor is responsible for the use of third party accessories.

(The functions shown in this manual may vary slightly from model to model, as the manual is a general description of the smartwatch, some models may differ from the standard).

The device must be charged for at least 2 hours before first use.

Before using the device, you must download the app, install it and accept all permissions, otherwise all functions will not be available.

The company reserves the right to modify the contents of this manual.

TOP BUTTON

The top button is used to switch the device on/off. To turn the smartwatch on/off, hold the button for 3 seconds. The bottom button turns the flashlight on/off. Touch for instructions on the main screen:

- Swipe down to access information about the watch model, QR code, brightness level, battery status, and whether the device is properly connected to your phone.

- Swipe up to access incoming messages

- Swipe left to access features including pedometer, tracking and sports modes

- Swipe right to access additional features including stopwatch, language, device off.

CHARGING INSTRUCTIONS

Fully charge the watch before using it for the first time. Once loaded, it will start automatically. Align the charging head and connect the magnetic suction charging port until the charging icon appears on the watch screen (2 hours continuous charging).

APPLICATIONS

Download the FitCloudPro app on your phone. This can be done in two ways:

1. Scan the QR code of the watch.

2. Search the Play Store or the Apps Store app and install it.

Once the app is installed, turn on Bluetooth and open the FitCloudPro app. Enable notifications and other permissions required by the app. Sign up, fill in your personal information.

Press the "Add Device" button, locate the "L15" device (turn on the GPS on your smartphone before pairing) and press the connect button.

FUNCTIONS

1. Pedometer: this function counts your daily steps, calories burned and distance walked.

2. Sleep monitor: the smartwatch automatically starts measuring your sleep quality from 10:00pm to 8:00am. A detailed report of your sleep quality will be available in the app.

3. Health: Heart rate measurement: wait 2 seconds before starting the measurement. The measurement is performed by scanning the skin with a green optical light. Slide to the right or left to complete the measurement.

The norms for heart rate measurement results are 60-90 beats per minute. Professional athletes can beat less than 60 beats per minute. However, with intense exercise, the measurement can reach up to 200 beats per minute.

4. Blood pressure: The measurement time is approximately 48 seconds. Keep in mind that older people have higher blood pressure than younger people. Conversely, women have lower blood pressure than men.

5. SP02H is the percentage of oxygen in the blood. The norm is 94-99%.

6. ECG: After connecting the ECG sensor, we need about 30 seconds to complete the measurement. When the measurement is complete, "ToApp" will be displayed. The ECG measurement will be saved in the app, which can be shared with others for comparison.

7. Sports modes: After selecting an activity, click on it and start exercising. You can take a break during the activity and then resume. Depending on the activity, heart rate, calories burned and calories walked are recorded.

MEASUREMENTS

1. Low battery: In the event of a low battery, you should charge the device immediately to protect battery life.

2. Charging: do not use the watch while it is charging.

3. Ambient temperatures above 50 °C during charging can lead to overheating, deformation and burning of the device.

4. Do not swim, dive or use the device underwater.

5. The device uses a built-in battery and is prohibited to disassemble separately.

6. Avoid contact with eyes and skin in case of battery rupture and leakage.

IMPORTANT INFORMATION

1. Security:

-Clean the watch and strap with a soft cloth (use clean water or sea water).

- Make sure the heart rate lens on the watch is close to your skin

- The skin temperature on the wrist is too low due to the weather, which affects the heart rate control.

2. Notes on water resistance (even if it is a waterproof watch): Pay attention to the following methods as they deteriorate the waterproofing.

-Don't wear the watch in the shower.

-Do not wear the watch in a heated pool, sauna or other high temperature/humidity environment.

-Do not wear the watch when washing hands or face, at work where soap or detergent is used.

-Be sure to wash off any salt or dirt from the watch when immersed in the sea.

WARRANTY

Warranty service:

1. Under normal use of the products, as long as the product has no mechanical damage and has not been caused by improper use,

24 months from the date of purchase, consumers can avail of free warranty service.

2. Consumers cannot avail of the warranty if:

A. the damage is self-inflicted,

B. the warranty period has expired,

C. they have not used the product in accordance with the instructions for use and maintenance,

D. the products have been disassembled, self-repaired or immersed in water.
