I. System requirements

 1. Android 5.0 and later

 2. iOS 9.0 and later

II. Application - MActive

1. Methods for downloading the application
- 1.1 Scan the QR code and install the application

*All permissions and approvals must be accepted, otherwise all functions will not be available.

- 1.2 Download and install the MActive app from Google Play (Android) or the App Store (iOS).

III. Bluetooth; time and date

Turn on Bluetooth on your phone and go to the installed app. Find your watch in the app and connect it to your phone. The time and date will automatically update when the smartwatch is successfully connected to the app.

14. **Sports modes:** there are 12 sports modes to choose from:

- Running
- walking
- cycling
- climbing
- table tennis
- badminton
- basketball
- skipping
- swimming
- tennis
- yoga
- weightlifting

During a workout, the smartwatch collects key data including workout length, calories burned, distance covered and more, depending on the mode selected.

IV. Charging

This product uses inductive charging. Connect the charger to the USB input. Place the watch on the charging plate. Charging will start automatically and the charging icon will appear on the screen. A full charge usually takes 2-2.5 hours.

V. Application

1. **Bottom button** - long press to turn the smartwatch on/off and return to the main menu.
2. **Top button** - press to enter the selected function, knob - navigate through the menu
3. **Scroll down** - settings, charge level, etc.
4. **Swipe left** - information on steps, calories burned, distance covered, heart rate measurement, sleep analysis and sports modes.
5. **Swipe right** - go to main menu
6. **Change dial** - hold the home screen for a few seconds or swipe the dial to change the look of the home screen.
7. The smartwatch is equipped with a **touch screen**, which can also be used to control the watch.

Warranty

The warranty is 24 months and covers defects in operation and manufacture. The warranty does not cover:

the life of the battery, hands and dial; normal wear and tear resulting from use and ageing (e.g. scratches on the glass, discolouration, etc.); damage to any part of the watch caused by misuse, negligence, accident; misuse and failure to follow the instructions for use; a product on which operations have been carried out by unauthorised persons (e.g. in connection with battery replacement, maintenance or repair).

Important

Please read the entire user manual carefully before use. We recommend using only the original battery, charger and accessories supplied with your device. The manufacturer and distributor are not responsible for the use of accessories from other manufacturers. Please charge the device for at least 2 hours before first use. The company reserves the right to change the content of this manual.

1. Waterproof to IP68
2. Battery capacity 330 mAh
3. Bluetooth 4.0
4. Charging time 2 - 2.5 hours
5. Package contents: Watchmark Wear3 smart watch, charging cable, user manual

VI. Notifications

1. Incoming call: the watch starts ringing. The home screen displays the caller's number or stored contact.

2. Messages/Notifications: the watch vibrates and the message content is displayed on the home screen. To receive notifications from individual apps, you must allow this in the app in question.

3. Alarm: set the watch to vibrate, ring, or ring with vibration. There are 5 ringtones to choose from. Up to 5 alarms can be set. 4.

4. Idle alarm: once set on the watch, it will vibrate to notify you that you are spending too much time resting.

5. Goal achievement notification: the watch will vibrate to notify you that you have reached today's goal. Set goals in the app.

VII. Menu

1. **Daily statistics:** informs you of the number of steps, calories burned and distance travelled. The watch automatically calculates the functions. This information will also be sent to the app. The counter will be reset at 24:00.

2. **Health function:** enter the selected function to perform the measurement. After a successful measurement, the result will be shown on the smartwatch display. The measurement history is saved in the app.

3. **Pulsometer:** heart rate measurement: number of beats per minute. It is assumed that the norm is between 60 and 100 beats per minute.

4. **Sleep monitor:** when the user falls asleep, the watch automatically switches to sleep detection mode. During sleep, the smart watch records data such as the length and quality of sleep and the number of awakenings during the night. The data is sent to the app. The sleep monitor works from 22:00 hours.

5. **Calendar:** enter the date display function, press the calendar icon to display the current month.

6. **Stopwatch:** after selecting the function will be timing, you can pause or clear the result.

7. **Calculator:** this function allows you to perform calculations.

Watchmark Wear3

Manual instruction

9. **Remote music play:** you can use the watch to remotely control the music playing in your phone.
