

DEAR CUSTOMER, THANK YOU FOR PURCHASING OUR PRODUCT!

Please read the entire instruction manual carefully before use. It is recommended to use only the original battery, charger and accessories included in the kit with the device.

Neither the manufacturer nor the distributor is responsible for the use of third party accessories.

(The functions listed in this manual may vary slightly between models as the manual is a general description of the smartwatch, some models may differ from the standard).

The device should be charged for at least 2 hours before first use.

Before using the device, you must download the app, install it and accept all permissions, otherwise all functions will not be available. The company reserves the right to change the contents of this manual.

BUTTONS

The top button is used to switch the device on/off. To turn the smartwatch on/off, hold the button for 3 seconds. The bottom button turns the flashlight on/off.

Touch for instructions on the main screen:

- Swipe down to access information about the watch model, QR code, brightness level, battery status, and whether the device is successfully connected to your phone.

- Swipe up to access incoming messages.

- Swipe left to access features including pedometer, timekeeping and sports modes.

- Swipe right to access additional features including stopwatch, language, device off.

CHARGING INSTRUCTIONS

Fully charge the watch before using it for the first time. After charging, it will start automatically. Align the charging head and connect the magnetic suction charging port until the charging icon appears on the watch screen (2 hours continuous charging).

OTHER FEATURES

- Language/Time/Date: Synchronises the date, time and language from your phone when connected via Bluetooth.

- Main interface. After making a selection, select it with a short click.

- Notifications: sync all notifications from your phone such as Facebook, WhatsApp, SMS, email, etc.

- Alarm: You can set multiple alarms via the APP.

- Stopwatch. The watch has a history of the last 20 measurements.

- Timer: Set the time you want to count down. When the countdown is complete, the watch will vibrate.

APPLICATIONS

Download the FitCloudPro app on your phone. This can be done in two ways:

- Scan the QR code from the watch.
- Search for the app in the Play Store or Apps Store and install it.

Once the app is installed, turn on Bluetooth and open the FitCloudPro app. Enable notifications and other permissions that the app requires. Sign up, fill in your personal information. Press the "Add Device" button, locate the "L11" device (turn on the GPS on your smartphone before pairing), and press the connect button.

PRECAUTIONS

1.Low battery charge level:

In case of low battery level, charge the device immediately to protect the battery life.

2.Charging

Do not use the watch while it is charging.

3. Ambient temperature when charging above 50 degrees Celsius can lead to overheating, deformation and burning of the device.

4. Do not swim, dive or use the device underwater.

5.The device uses a built-in battery and it is prohibited to disassemble it separately.

6. Avoid contact with eyes and skin in case of battery rupture and leakage.

FUNCTIONS

1.Pedometer: this function counts your daily steps, calories burned and distance walked.

2.Sleep monitor: the smartwatch automatically starts measuring the quality of your sleep from 22:00 to 8:00. A detailed sleep quality report will be available in the app.

3.Health:

- Heart rate measurement: wait 2 seconds before measuring. The measurement is made by scanning the skin with a green optical light. To stop the measurement, slide your finger to the right or left.

The norms for heart rate measurement results are 60-90 beats per minute. Professional athletes may have less than 60 beats per minute. However, during intense exercise, a reading of up to 200 beats per minute can be taken.

- Blood pressure. The measurement time is approximately 48 seconds. Keep in mind that older people have higher blood pressure than younger people. Conversely, women have lower blood pressure than men.

- Blood oxygenation: SP02H is the percentage of oxygen in the blood. The norm is 94-99%.

- ECG: Once the ECG sensor is connected, it takes about 30 seconds to take the measurement. When the measurement is complete, the message "ToApp" will be displayed. The ECG measurement will be saved in the app, which can be shared with other users for reference.

4. Sports Modes: You can choose from 9 sports modes: walking, running, cycling, climbing, swimming, yoga, table tennis, badminton, volleyball, jump rope.

After selecting an activity, click on it to start practicing. You can take a break during the activity and then resume. Depending on the activity, heart rate, calories burned, distance walked, number of steps and speed at which we moved are recorded.

5. Remote music control: you can use the watch to control the music playing on your phone.

6. Weather forecast. The phone must have GPS enabled and local weather conditions can be obtained under normal network conditions.
